product resources

cantilever table embodies the dynamic potential of objects that adapt and evolve to meet shifting needs. Designed with collaborative workspaces and events in mind, this table redefines spaces by becoming a work desk, dining table, or artist station with simple adjustments and additions.

Its flexible honeycomb base — available in paper or textile — is a pleated structure that effortlessly folds flat for storage or transport, allowing a space to reset for varied use. When paired with a tabletop of marble or durable PaperStone®, there is a striking contrast of textures — soft yet structured, airy yet solid.

cantilever tabletop is available in two configurations: as a seamless surface or with a central opening designed for added functionality and imagination. This opening was created so that a glass multi-use centerpiece could be placed with the tabletop, acting as a holder for artist tools, chopsticks, or flowers. This version includes a spindle for a stack of paper sketching circles, inviting a continuous evolution of ideas as it spins around the table during working sessions.

To further promote versatility, many honeycomb bases can be connected, expanding into any desired length or configuration, paired with modular tabletops.

Design by Stephanie Forsythe and Todd MacAllen

Following an event or collaborative working session, the paper table compresses flat for easy storage and transport, returning flexible space to its surroundings.

Using airy honeycomb geometry, the base expands into a sturdy circular form and folds back onto itself with precision.

White and aluminum are crafted from a reinforced, high-tensile textile, similar to the material used for softwall. Both water and tear resistant, this sturdy base provides impressive weight-bearing capacity.

A glass centerpiece acts as a pencil holder and spindle for sketching circles, or doubles as a flower vase.

PaperStone® tops are offered with or without a central hole.

cantilever table harmonizes with other elements in the soft collection through flexible form, design intent, and a shared visual language.

molo offers custom Carrara marble tops. Alternatively, drawings are available if you wish to fabricate a top locally.

The relaxed formality of a standing height table encourages coworkers and strangers alike to join together and collaborate.

cantilever table base in black paper, paired with a black PaperStone® top, offers depth and contrast within a space.

A twist on the office whiteboard, sketching circles add tactile engagement to the collaboration process. As sheets spin around the table, ideas develop and grow.
