cloud softlight pendant + mobile

cloud softlight creates a canopy of gentle, luminous forms. Available in various sizes of individual pendants or suspended mobiles, cloud provides diffused light and a sense of intimate enclosure. When grouped together, they create vast, sculptural skyscapes.

Inspired by the marvelous kinetic sculptures of Alexander Calder, cloud mobile similarly redefines space through its gentle movement and weightless, three-dimensional shapes. Each honeycomb shade is affixed to the structure by a single point so that they ripple and revolve with shifting air currents.

cloud mast is a floor-supported luminary. The mast is crowned by a boom that holds a cloud mobile in shifting balance with a large fishing weight, a delicate and beautiful alternative to wiring the mobiles to a ceiling.

The textile shades are illuminated from within by energy efficient 90+ CRI LEDs, available in warm white (2700K) and neutral white (4000K) colour temperatures. Their honeycomb structure absorbs sound, subduing reflected noise within a space.

Design by Stephanie Forsythe + Todd MacAllen

cloud pendant is available in four sizes.

cloud mobile is available in three sizes and cloud mast is available in three corresponding sizes.

a second fishing weight is added to the large cloud mast to counterbalance the increased size and weight of the cloud forms.

hanging clouds low allows their sculptural qualities to inhabit a space.

the hollow clouds, made from white polyethylene non-woven textile, are internally lit by LEDs, making the sculptural three dimensional forms mysteriously radiant when viewed from any direction.
